blackbox™
POWERED BY PHITEK® ANR™ TECHNOLOGY

YOUR SOUND.™
LESS NOISE.

i10
Active Noise Cancelling Earphones

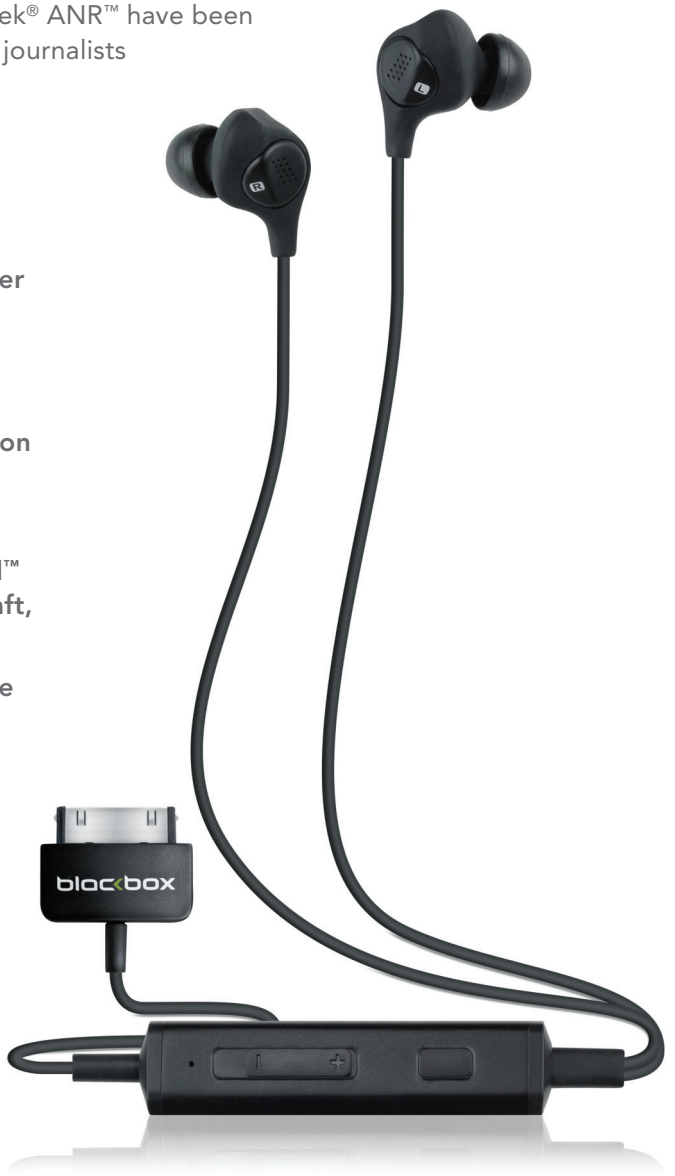
The Blackbox™ Difference

Blackbox™ i10 earphones are specifically designed to work seamlessly with the †iPod™ family of portable music devices. Drawing power from the iPod™ itself the i10 incorporates Phitek® ANR™ Active Noise Rejection™ technology to deliver hi-fidelity sound – providing deep bass, clear vocals and natural highs from a music source.

Ergonomically designed earphones which fit comfortably within the ear, ensure the very best in personal listening performance and comfort, especially with Music On The Move. Avoiding the need for additional batteries, the i10 sports an unobtrusive, slim-line medallion giving easy access to volume controls.

The result is a stylish personal listening device that gives a great listening experience, significantly reducing typical background noise such as transit vehicles, trains and aircraft cabins – even the distraction of busy, open plan office environments.

Premium audio products which incorporate Phitek® ANR™ have been awarded 'Best In Class' by leading international journalists writing for *Wired, PC Magazine, iLounge* and *What Hi-Fi? Sound and Vision.*



Key Features

- **Specifically designed to work with †iPod™**
- **Slim-line volume control medallion with power drawn from the iPod™**
- **Ergonomically-designed earphones provide accurate, extended listening**
- **World-leading Phitek® ANR™ noise-cancellation for purer sound-from-source**
- **Comfort-fit replaceable ear buds**
- **Reduces listener stress when accessing †iPod™ sourced entertainment during travel in aircraft, trains and buses, etc**
- **Convenient hard-sided carry pouch for secure transport or storage**
